

statements and "Liquidity and Capital Resources."

Historically, substantially all of our revenue has been generated from sales to customers in the United States. However, we have generated revenue in Canada and hoped to enter additional international markets, which may require significant management attention and financial resources. International sales are subject to a variety of risks.

Our quarterly and annual operating results have varied significantly in the past. The variation in operating results may continue and may intensify. We believe that period to period comparisons of results of operations are not necessarily meaningful and should not be relied upon as indicators of future performance. Our operating results may continue to fluctuate as a result of many factors, including the length of the sales cycles for new or existing customers, the size, timing or duration of significant customer contracts, fluctuations in number of subscriber records under management, timing or duration of service offerings, rate of adoption of wireless services by Public Safety Answering Points, efforts expended to accelerate the introduction of certain new products, our ability to hire, train and retain qualified personnel, increased competition, changes in operating expenses, changes in our strategy, the financial performance of our customers, changes in telecommunications legislation and regulations that may affect the competitive environment for our services, and general economic factors. Our contracts for 9-1-1 OSS services generally include a separate non-recurring fee for the design and implementation of the 9-1-1 OSS, conversion of the customer's data to our systems, hiring and training of personnel, and other costs required to prepare for the processing of customer data, and therefore, we may recognize significantly increased revenue for a short period of time upon commencing services for a new customer.

Our expense levels are based in significant part on our expectations regarding future revenue. Our revenue is difficult to forecast because the market for our services is evolving rapidly and the length of our sales cycle, the size and timing of significant customer contracts and license fees and the timing of recognition of non-recurring initial fees vary substantially among customers. Accordingly, we may be unable to adjust spending in a timely manner to compensate for any unexpected shortfall in revenue. Any significant shortfall could therefore have a material adverse effect on our business, financial condition and results of operations. We will incur expenses of approximately \$10 million in 2000 for research, development and marketing to expand our product offerings. In addition, we hired additional employees in 1999, 1998 and 1997, and expect to continue hiring additional employees during 2000. We also began leasing office space in Texas in December 1999, from which we will perform some of our operations. We cannot assure you that we can report operating profits or that our investments in research and development will generate future revenue. Failure to do so could have a material adverse effect on our business, financial condition and results of operations.

Results of Operations Year Ended December 31, 1999 Compared to Year Ended December 31, 1998

Revenue

Total Revenue. Total revenue decreased 5%, from \$34.4 million in 1998 to \$32.6 million in 1999.

Data Management Services Revenue. Revenue from data management services increased 5%, from \$30.8 million in 1998 to \$32.1 million in 1999, representing approximately 89% and 90% of total revenue, respectively. Data management services revenue increased due to an increase in the number of records under management for RLEC and CLEC customers caused by

customer growth and the signing of additional CLEC contracts. These increases were offset by monthly minimum fees from a wireless carrier in 1999 that expired at the end of 1998 and a decrease in non-recurring fees related to wireless and wireline services.

License and Implementation Services. Revenue from license and implementation services decreased 87%, from \$3.6 million in 1998 to \$468,000 in 1999, as we had no license and implementation services contracts in process in 1999 other than warranty contracts.

Costs and Expenses

Cost of Data Management Services. Cost of data management services consists primarily of labor and costs of communication with customers' systems and our infrastructure. Cost of data management services increased 17%, from \$20.7 million in 1998 to \$24.3 million in 1999, representing 60% and 75% of total revenue, respectively, and 68% and 73% of data management services revenue, respectively. The dollar increase was due to the pilot phase and start of implementation of our contract with the State of Texas, increased depreciation expense and telephone lines to accommodate growth in our wireless and wireline operations, and additional headcount and related costs incurred to accommodate growth for both wireline and wireless services. The percentage increase occurred primarily because the rollout of our wireless and wireline services has been slower than anticipated, although we have built the infrastructure to service the anticipated demand, and the infrastructure required to begin the State of Texas contract before significant revenue was generated. In addition, in 1999, we received monthly wireline fees from a wireless customer which expired at the end of 1998.

Cost of License and Implementation Services. Cost of license and implementation services consists primarily of labor, license fees for third party software and related expenses. Cost of license and implementation services decreased 83%, from \$836,000 in 1998 to \$138,000 in 1999, representing 2% and 0.4% of total revenue, respectively, and 22% and 28% of license and implementation services revenue, respectively. The dollar decrease occurred because we had no license and implementation services contracts in process during 1999 other than warranty contracts.

Sales and Marketing. Sales and marketing expenses consist primarily of expenses related to salaries and commissions, travel, trade shows and sales collateral. Sales and marketing expenses increased 29%, from \$4.1 million in 1998 to \$5.3 million in 1999, representing 12% and 16% of total revenue, respectively. The dollar increase was due to the addition of marketing personnel, the creation of a government affairs department to interpret and influence legislation primarily related to our wireless operations and related legal expenses, addition of sales staff for enhanced service and an increase in trade show expenses.

General and Administrative. General and administrative expenses consist primarily of expenses related to our information systems, finance, human resources, legal, executive and financial planning departments. General and administrative expenses decreased 1%, from \$5.0 million in 1998 to \$4.9 million in 1999, representing 14% and 15% of total revenue, respectively. We experienced decreases due to a decrease in expenses related to the relocations of our chief operating officer and chief financial officer. These decreases were primarily offset by:

- the addition of information technology personnel and related expense;
- increased legal and accounting costs related to quarterly and annual reporting requirements as we became a publicly traded company in June 1998;

- increased legal staffing and other fees related to regulatory and legislative issues concerning the implementation of our services in Texas; and

- the creation of an executive relations department.

Other Income (Expense). Net other income (expense) consists primarily of interest expense from our borrowings and losses for capital equipment, offset by interest income earned on our cash and investment balances. Net other expense was \$294,000 in 1998 compared to net other income of \$607,000 in 1999, representing (1)% and 2% of total revenue for such periods, respectively. The dollar increase in net other income was primarily due to a decrease in interest expense related to the repayment of certain bank debt maturing through the second quarter of 1998 and repayment of certain capital leases and an increase in interest earned from the investment of funds received from our initial public offering in June and July of 1998.

Benefit for Income Taxes. Our income tax benefit from continuing operations increased from \$379,000 in 1998 to \$468,000 in 1999. In 1998, we reversed a portion of our valuation allowance and in 1999 recorded an income tax benefit related to our deferred tax assets as we believe that it is more likely than not that the tax assets will be realized.

Loss from Operations of Discontinued Division. We recorded a charge of \$225,000 in 1999, net of the related tax benefit, related to the final cleanup of unassigned contracts and the resolution of customers in the company that acquired this division.

Loss from Early Extinguishment of Debt. We recorded a charge of \$909,000 in 1998, net of the related tax benefit, related to the write-off of the remaining debt discount and other costs associated with the early extinguishment of our bank debt.

Year Ended December 31, 1998 Compared to Year Ended December 31, 1997

Revenue

Total Revenue. Total revenue increased 27%, from \$27.1 million in 1997 to \$34.4 million in 1998.

Data Management Services Revenue. Revenue from data management services increased 28%, from \$24.8 million in 1997 to \$30.8 million in 1998, representing approximately 89% of total revenue in both periods. The increase resulted primarily from license fees.

- monthly fees from wireless customers due to an increase in the number of subscribers under management;

- non-recurring and monthly fees from wireless customers, as we did not begin to earn revenue from wireless customers until the third quarter of 1997 and signed several new contracts in 1998;

- non-recurring fees from enhanced services; and
- non-recurring fees from new wireline customers that were transitioned to our system.

License and Implementation Services. Revenue from license and implementation services increased 25%, from \$3.1 million in 1997 to \$3.6 million in 1998, due to increased work performed on contracts that began in 1997 and were completed or terminated during 1998.

Costs and Expenses

Cost of Data Management Services. Cost of data management services increased 35%, from \$15.4 million in 1997 to \$20.7 million in 1998, representing 57% and 60% of total revenue, respectively, and 64% and 68% of

data management services revenue, respectively. The dollar increase was due to the addition of personnel and equipment and expansion of facilities to accommodate growth in our wireless and wireline operations.

Cost of License and Implementation Services. Cost of license and implementation services decreased 35%, from \$1.3 million in 1997 to \$836,000 in 1998, representing 5% and 2% of total revenue, respectively, and 42% and 22% of license and implementation services revenue, respectively. The decrease in dollars and as a percent of license and implementation services revenue was primarily due to the reversal of accrued third party software fees that will not be required and an increase in warranty revenue, both of which resulted from the cancellation of our contract with Bell Atlantic.

Sales and Marketing. Sales and marketing expenses increased 7%, from \$3.9 million in 1997 to \$4.1 million in 1998, representing 14% and 12% of total revenue, respectively. The increase was primarily due to salaries and related costs of hiring additional sales and marketing personnel during 1998 and public relations costs incurred in 1998. These increases were partially offset by decreases in sales commissions, as well as the transfer of a vice president to a general and administrative position.

General and Administrative. General and administrative expenses increased 54%, from \$3.2 million in 1997 to \$5.0 million in 1998, representing 12% and 14% of total revenue, respectively. The dollar increase was due to:

- the realignment of certain continuing resources, infrastructure and related general and administrative expenses applicable to continuing operations;
- addition of personnel and computer equipment to the accounting, information systems, legal and human resources departments to support our growth;
- the transfer of a marketing vice president to a general and administrative position; and
- strategic consulting costs incurred in 1998.

The increases were partially offset by a decrease in executive bonuses.

Other Expense, Net. Other expenses decreased 61%, from \$878,000 in 1997 to \$294,000 in 1998, representing 3% and 1% of total revenue, respectively. The dollar decrease was primarily due to the repayment of certain bank debt and capital leases during 1998 and interest earned from the investment of funds from our initial public offering in June and July of 1998.

Income Tax Benefit. The income tax benefit of \$379,000 in 1998 consists of the reversal of a portion of our valuation allowance on our deferred tax assets, compared to a reversal of valuation allowance of \$2.4 million in 1997. We did not record a state income tax provision in 1998 primarily due to the utilization of state net operating loss carry forwards. In 1997, we recorded a state provision of \$172,000 as more business was conducted in states where net operating loss carryforwards were not available.

Loss from Sale and Operations of Discontinued Division. In 1997, we recorded a charge of \$2.8 million, net of the related tax effect, related to the sale of the net assets of our Permit Products Division.

Loss from Early Extinguishment of Debt. We recorded a charge of \$900,000 in 1998, net of the related tax benefit, related to the write-off of the remaining debt discount and other costs associated with the early extinguishment of our bank debt.

Liquidity and Capital Resources

Since our inception we have funded our operations with cash provided by operations, supplemented by equity and debt financing and leases on capital equipment. As of December 31, 1999, we had \$21.5 million in cash and cash equivalents and investments in marketable securities.

In June 1998, we completed an initial public offering of 2,100,000 shares of our common stock, which generated proceeds of \$22.5 million to us, net of the underwriter's discount and other offering costs. We used approximately \$4.4 million of the proceeds to repay our bank loans and \$160,000 for the related prepayment penalty. In July 1998, the underwriters of our initial public offering exercised their over-allotment option. Under the over-allotment option, we sold an additional 315,000 shares of our common stock, generating net proceeds of \$3.5 million.

In addition to the \$4.4 million of debt repaid with the proceeds of the initial public offering, we repaid \$3.6 million and \$1.9 million of other bank debt and capital lease obligations during 1998 and 1999, respectively. Additionally, we used \$3.4 million and \$2.5 million during 1998 and 1999, respectively, for the purchase of capital assets and software development. We anticipate that our level of spending for capital expenditures in 1999 will continue during 2000, although we currently have no material commitments for capital expenditures.

We have a line of credit with a bank equal to \$2.0 million, which is available to meet operating needs. The interest rate on amounts borrowed under the line of credit is equal to the bank's prime rate or the one, two or three month LIBOR rate plus 2.25% per annum. The line of credit matures April 15, 2000 and is collateralized by certain of our assets. As of December 31, 1999, no borrowings were outstanding on the line of credit.

We also have a \$2.0 million capital lease line with a bank which is available to meet capital acquisition needs that arise from normal business operations. The interest rate on capital leased under the lease line is equal to the bank's cost of funds at the time of each lease. Separate lease schedules are signed from time to time. Each lease schedule is collateralized by the assets that are being leased. Each lease has its own termination date, typically 36 months. As of December 31, 1999, \$582,000 was outstanding on the capital lease line.

We have announced plans to incur research, development and marketing expenses of approximately \$10 million to expand our product offerings. This will require approximately \$13 million in cash due to the capital expenditures requirements. We may also increase our capital lease line to finance this initiative. We believe that our remaining net proceeds from our initial public offering, cash generated from operations and lease financing will be sufficient to fund our anticipated working capital needs, research and development initiative, capital expenditures and any potential future acquisitions through at least the next twelve months. In the event our plans of assumptions change or prove to be inaccurate, or if we consummate any unplanned acquisitions of businesses or assets, we may be required to seek additional sources of capital. Sources of additional capital may include public and private equity and debt financings, sales of nonstrategic assets and other financing arrangements.

Year 2000 Capability

Many currently installed computer and software products were coded to accept only two digit entries in the date code field. These date code fields need to accept four digit entries to distinguish twenty-first century dates from twentieth century dates. We use off-the-shelf and custom software

developed internally and by third parties for our production, information technology (IT) and non-IT systems.

We programmed and tested our systems and installed all upgrades necessary to make them Year 2000 compliant. We spent about \$400,000 to make our systems Year 2000 compliant. As a result of our Year 2000 readiness efforts, our production systems, IT systems and non-IT systems successfully distinguished twenty-first century dates from twentieth century dates on January 1, 2000 without any system failures. However, we are continuing to monitor our systems throughout the year 2000 to ensure that any latent Year 2000 matters that may arise are addressed promptly. Despite the fact that many computer software and computer systems are currently processing twenty-first century dates correctly, those companies, including us, could experience latent Year 2000 problems.

Recently Issued Accounting Pronouncements

Statement of Financial Accounting Standards No. 133

and No. 137

In June 1998, the Financial Accounting Standards Board, or FASB, issued Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities." SFAS 133 establishes accounting and reporting standards for derivative financial instruments and hedging activities related to those instruments as well as other hedging activities. It requires an entity to recognize all derivatives as either assets or liabilities in the statement of financial position and measures those instruments at fair value. In June 1999, the FASB issued Statement of Financial Accounting Standards No. 137, "Accounting for Derivative Instruments and Hedging Activities." SFAS 137 is an amendment of SFAS Statement No. 133. SFAS No. 137 delays the effective date of SFAS No. 133 to financial quarters and financial years beginning after June 15, 2000.

We do not typically enter into arrangements that would fall under the scope of Statement No. 133 and thus, management believes that Statement No. 133 will not significantly affect our financial condition and results of operations.

Statement of Position 98-9

In December 1998, the American Institute of Certified Public Accountants issued Statement of Position 98-9, "Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions." SOP 98-9 amends certain paragraphs of Statement of Position 97-2, "Software Revenue Recognition," to require the application of a residual method of accounting for software revenue when certain conditions exist. SOP 98-9 also amends Statement of Position 98-4, "Deferral of the Effective Date of a Provision of SOP 97-2," to extend the deferral of the application of certain passages of SOP 97-2 provided by SOP 98-4 through fiscal years beginning on or before March 15, 1999. All other provisions of SOP 98-9 are effective for transactions entered into in fiscal years beginning after March 15, 1999. Earlier adoption is permitted; however, retroactive application is prohibited. We believe SOP 98-9 will not materially impact our financial statements.

Staff Accounting Bulletin No. 101

In December 1999, the Securities and Exchange Commission staff released Staff Accounting Bulletin No. 101, "Revenue Recognition." SAB 101 provides interpretive guidance on the recognition, presentation and disclosure of revenue in financial statements. SAB 101 must be applied to financial statements no later than the second fiscal quarter of 2000. We are currently reviewing SAB 101 to determine what impact, if any, the adoption of SAB 101 will have on our financial position and results of operations.

Notes to Financial Statements

(1) Organization, Business and Liquidity
SCC Communications Corp. (the "Company") is a Delaware corporation. The Company is the leading provider of 9-1-1 operations support systems services to incumbent local exchange carriers ("ILECs"), competitive local exchange carriers ("CLECs"), wireless carriers and state and local governments in the United States. The Company manages the data which enables 9-1-1 calls to be routed to the appropriate public safety agency with accurate and timely information about the caller's location and location. In addition, the Company licenses its 9-1-1 software to carriers that wish to manage the delivery of 9-1-1 data management services to their customers.

(2) Summary of Significant Accounting Policies

Operating Cycle
Assets and liabilities related to contracts are included in current assets and liabilities in the accompanying balance sheets since they will be liquidated in the normal course of contract completion, although this may require more than one year.

Property and Equipment
Depreciation of property and equipment is computed using the straight-line method over estimated useful lives of three to five years for computer hardware and equipment, seven years for furniture and fixtures and the life of the lease for leasehold improvements. The cost of repairs and maintenance are expensed while enhancements to existing assets are capitalized. Depreciation expense totaled approximately \$4,888,000, \$4,178,000 and \$3,598,000 for the years ended December 31, 1997, 1996 and 1995, respectively.

Software Development Costs
The Company expenses the costs of developing computer software until technological feasibility is established and capitalizes all costs incurred from that time until the software is available for general customer release. Technological feasibility for the Company's computer software products is based upon the number of the achievement of (a) a detailed program design free of high-risk development issues or (b) completion of a working model. Costs of major enhancements to existing products with a wide market are capitalized while routine maintenance of existing products is charged to expense as incurred. The establishment of technological feasibility and the ongoing assessment of the recoverability of capitalized computer software development costs require considerable judgment by management with respect to various external factors, including, but not limited to, technological feasibility, anticipated future gross revenue, estimated economic life and changes in software and hardware technology.

Capitalized software costs are amortized on a product-by-product basis. The amortization is the greater of (a) the amount computed using (a) the ratio that current gross revenue for a product compares to the total of current and anticipated future gross revenue for that product, or (b) the straight-line method over the remaining estimated economic life of the product which is typically five years. Amortization expense related to capitalized software costs totaled approximately \$229,800, \$145,000 and \$107,000 for the years ended December 31, 1997, 1996 and 1995, respectively, and is included in cost of data management services and licenses and implementation services in the statement of operations.

Revenue Recognition

The Company reports revenue based on its two segments: data management services and licenses and implementation services. Revenue from data management services generally consists of a non-recurring fee and monthly recurring revenue. Revenue included in data management services generally includes a non-recurring fee for the design and implementation of the 9-1-1 OSS, conversion of the customer's data to the Company's system, hiring and training of personnel, and other costs required to prepare for the processing of customer data. Non-recurring fees are recognized on the percentage-of-completion method over the period required to perform the units necessary to prepare for the processing of customer data. The Company's contracts also separately allow for a monthly service fee based on the number of subscriber records under management, which is recognized in the period in which the services are rendered. Data management services revenue also may include revenue from enhanced products and services, which may include non-recurring and/or monthly fees which are separately stated in the contract and are recognized in the period in which the services are performed.

Revenue related to software licenses and implementation of the Company's 9-1-1 systems at customer sites is recognized using the percentage-of-completion method because the Company's software requires significant modification for each customer. Such contracts include a license fee for the use of the Company's software and service fees for the installation and customization of the system. The Company's costs to install its system include direct labor, third-party license fees and miscellaneous expenses. Such costs are included in cost of licenses and implementation services.

In applying the percentage-of-completion method, revenue and related costs are recognized based on the percentage that labor hours incurred to date compared to total estimated labor hours. Revenue recognized in excess of amounts billed is reflected as unbillable revenue and amounts billed in excess of revenue recognized are reflected as deferred contract revenue in the accompanying balance sheets. The Company recognizes any known or anticipated loss on contracts in periods when such losses are determined to exist.

Revenue from licenses and implementation services includes customer support revenue which is recognized ratably over the related contract period on a straight-line basis. Costs related to customer support revenue are included in cost of licenses and implementation services in the accompanying statement of operations.

Concentration of Credit Risk

Financial instruments which potentially subject the Company to concentrations of credit risk are primarily cash and cash equivalents, accounts receivable and investments in high-grade treasury bonds and commercial paper. The Company maintains its cash balances in the form of bank demand deposits, money market accounts, treasury bonds and commercial paper with original maturities less than ninety days. The Company's deposits and investments are with financial institutions that management believes are creditworthy and investments are high-grade. The Company's accounts receivable are from customers that are generally telecommunications service providers; accordingly, the Company's accounts

Recently Issued Accounting Pronouncements Statement of Financial Accounting Standards No. 133 and No. 137

In June 1998, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("SFAS No. 133"). SFAS No. 133 establishes accounting and reporting standards for derivative financial instruments and hedging activities related to those instruments as well as other hedging activities. It requires an entity to recognize all derivatives as either assets or liabilities in the statement of financial position and measures those instruments at fair value. In June 1999, the FASB issued Statement of Financial Accounting Standards No. 137, "Accounting for Derivative Instruments and Hedging Activities - Deferral of the Effective Date of SFAS No. 133 - An amendment of SFAS Statement No. 133" ("SFAS No. 137"). SFAS No. 137 delays the effective date of SFAS No. 133 to financial quarters and financial years beginning after June 15, 2000. The Company does not typically enter into arrangements that would fall under the scope of Statement No. 133 and thus management believes that Statement No. 133 will not significantly affect its financial condition and results of operations.

Statement of Position 98-9

In December 1998, the American Institute of Certified Public Accountants issued Statement of Position 98-9 ("SOP 98-9"), "Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions." SOP 98-9 amends certain paragraphs of Statement of Position 97-2 ("SOP 97-2"), "Software Revenue Recognition," to require the application of a residual method of accounting for software revenue when certain conditions exist. SOP 98-9 also amends Statement of Position 98-4 ("SOP 98-4"), "Deferral of the Effective Date of a Provision of SOP 97-2" to extend the deferral of the application of certain passages of SOP 97-2 provided by SOP 98-4 through fiscal years beginning on or before March 15, 1999. All other provisions of SOP 98-9 are effective for transactions entered into in fiscal years beginning after March 15, 1999. Earlier adoption is permitted; however,

retrospective application is prohibited. The Company believes SOP 98-9 will not materially impact its financial statements.

Staff Accounting Bulletin No. 101

In December 1999, the Securities and Exchange Commission staff released Staff Accounting Bulletin No. 101, "Revenue Recognition" ("SAB 101"). SAB 101 provides interpretive guidance on the recognition, presentation and disclosure of revenue in financial statements. SAB 101 must be applied to financial statements no later than the second fiscal quarter of 2000. The Company is currently reviewing SAB 101 to determine what impact, if any, the adoption of SAB 101 will have on its financial position and results of operations.

(3) Discontinued Operations

On June 30, 1997, the Company sold the net assets of its Premier Products Division. The sale resulted in a net loss of \$2,032,000. The net assets of this division are included in the statements of operations as loss from operations of discontinued division. Revenue from this division for the six months ended June 30, 1997 was \$3,785,000. Net loss from operations of this division totaled \$226,000 and \$876,000 in 1999 and 1997, respectively, and are presented in the Company's financial statements as loss from operations of discontinued division. The loss from discontinued operations in 1999 resulted from asset cleanup of unassigned contracts and the termination of customers to the company that acquired this division.

(4) Stockholders' Equity (Deficit)

Common Stock and Preferred Stock

In March 1998, the Company's Board of Directors authorized an increase in common stock to 30,000,000 shares and authorized 15,000,000 shares of undesignated preferred stock. In 1998 the Company also retired 36,259 shares of treasury stock.

Mandatorily Redeemable Convertible Preferred Stock
In connection with the Company's initial public offering in June 1998, the Company's mandatorily redeemable convertible preferred stock was converted on a one-for-one basis to common stock. Activity for 1997, 1998 and 1999 is as follows:

The activity related to the liquidation or redemption value of Series A through Series F Convertible Preferred Stock for the periods ended December 31, 1997, 1998 and 1999 is as follows:

	Series A	Series B	Series C	Series D	Series E	Series F	Total
Balance at January 1, 1997	1,000,000	1,000,000	1,000,000	1,000,000	1,000,000	1,000,000	6,000,000
Issuance of Series A	1,000,000						1,000,000
Issuance of Series B		1,000,000					1,000,000

Issuance of Series D				1,000,000			1,000,000
Issuance of Series E					1,000,000		1,000,000
Issuance of Series F						1,000,000	1,000,000
Redemption of Series A	(1,000,000)						(1,000,000)
Redemption of Series B		(1,000,000)					(1,000,000)
Redemption of Series C			(1,000,000)				(1,000,000)
Redemption of Series D				(1,000,000)			(1,000,000)
Redemption of Series E					(1,000,000)		(1,000,000)
Redemption of Series F						(1,000,000)	(1,000,000)
Balance at December 31, 1999	1,000,000	1,000,000	1,000,000	1,000,000	1,000,000	1,000,000	6,000,000

Puttable Common Stock Warrant

In November 1997, the Company borrowed \$4,000,000 from Banc One Capital Partners II, LLC (the "Lender") (Note 5). In connection with the loan, the Lender received a warrant to purchase 195,148 shares of the Company's common stock for \$100. In June 1998, the Lender exercised this warrant. Because of the put feature of the warrant, the Company recorded an amount equal to the number of shares under the warrant times the difference between the current market value, as defined, and the market value of the shares at the time the warrant was issued. This amount was recorded as an increase in the value of the puttable common stock warrant and charged to accumulated deficit in the accompanying financial statements through the time that the warrant was exercised. This amount recorded was \$77,000 and \$8,000 in 1998 and 1997, respectively.

Stock Subscriptions Receivable

In September 1997, in connection with the sale of the Company's Premier Products Division, several former employees of the Company signed full revenue promissory notes to the Company to exercise their vested stock options. The notes accrue interest at 6.97% per annum. The Company extended the due date on the notes to March 30, 1999 and is pursuing collection of the note that remains unpaid.

Stock Option Plan

The Company adopted the 1998 Stock Incentive Plan ("1998 Plan") effective June 23, 1998, which is a successor to the Company's 1990 Option Plan. As of December 31, 1999, a total of 3,253,847 shares have been authorized for issuance

under the 1998 Plan, including shares authorized under the 1990 Option Plan. The shares reserved for issuance will increase automatically on the first trading day of each calendar year, beginning with the 1999 calendar year, by 3% of the number of shares of common stock outstanding on the last trading day of the immediately preceding calendar year. The share reserve was increased by 328,340 shares under this provision in 1999. The 1998 Plan allows for issuance of options to officers, non-employee Board members and consultants, as provided for under the terms of the 1998 Plan.

Employee Stock Purchase Plan

On March 18, 1998, the Company adopted an employee stock purchase plan ("ESPP") under which eligible employees may contribute up to 10% of their salary through payroll deductions to purchase shares of the Company's common stock. The first offering period of the ESPP began March 1, 1998 and ended on December 31, 1998. Thereafter, offering periods will be successive six month periods. At the end of each offering period, amounts contributed by employees will be used to purchase shares of the Company's common stock at a price equal to 85% of the lower of the closing price of the common stock on the first day or last day of the offering period. The Company's Board of Directors has authorized the issuance of up to 200,000 shares under the ESPP and may terminate the ESPP at any time. As March 1 of each year, the shares available under the ESPP will be reduced to 200,000, although the Company's Board of Directors may elect to reduce a lower number of shares. The Company issued 36,679 and 61,103 shares under the ESPP in 1998 and 1999, respectively.

SFAS 123, "Accounting for Stock-Based Compensation," defines a fair value-based method of accounting for employee stock options or similar equity instruments. However, SFAS 123 allows the continued measurement of compensation on a per share basis using the intrinsic value-based method prescribed by APB Opinion No. 25, provided that pro forma disclosures are made of net income or net assets if the fair value-based method of SFAS 123 had been applied. The Company has elected to account for its stock-based compensation plans under APB 25; accordingly, for purposes of the pro forma disclosures presented herein, the Company has computed the fair values of all options granted under the 1996 Plan, which succeeds the 1990 Option Plan, during 1995, 1996 and 1997, using the Black-Scholes pricing model and the following weighted average assumptions:

To estimate lives of options for this valuation, it was assumed options will be exercised upon becoming fully vested. All options are initially assumed to vest. Convexity-compensation cost recognized in prior periods and income or loss with respect to options that are forfeited prior to vesting is adjusted as a reduction of prior period compensation expense in the period of forfeiture. Because the Company's common stock was not yet publicly traded, the expected market volatility was assumed to be zero in 1997. In 1998 and 1999, the Company's common stock was not yet traded for an extended period of time, thus the expected market volatility was based on the stock prices of companies whose operations are similar to the Company's.

Actual volatility of the Company's common stock may vary. Fair value computations are highly sensitive to the volatility factor assumed; the greater the volatility, the higher the computed fair value of options granted.

The total fair value of options granted under the 1998 Option Plan and the ESPP was computed to be approximately \$2,630,000, \$1,405,000 and \$499,000 for the years ended December 31, 1999, 1998 and 1997, respectively. These amounts are amortized ratably over the vesting periods of the options or recognized at date of grant if no vesting period is required. Pro forma stock-based compensation, net of the effect of forfeitures, was \$496,000, \$417,000 and \$232,000 for 1999, 1998 and 1997, respectively.

A summary of stock options under the 1993 Plan and the ESPP as of December 31, 1999, 1998 and 1997 and changes during the years then ended are presented below:

[illegible]

The following table summarizes information about the options outstanding at December 31, 1999:

[illegible]

If the Company had accounted for its stock-based compensation plan in accordance with SFAS 123, the Company's net income from continuing operations would have been reported as follows:

	1979	1978	1977
1. Total	11,062,000	11,062,000	11,062,000
2. Total	11,373,000	11,373,000	11,373,000
3. Total	0.10	0.10	0.10
4. Total	0.12	0.12	0.12
5. Total	0.10	0.10	0.10
6. Total	0.10	0.10	0.10

(5) **Long-term debt**
At December 31, 1999 and 1998, long-term debt consisted of the following:

	December 31, 1995	1994
Long-term debt	\$1,000,000	\$1,000,000
Current liabilities	1,000,000	1,000,000
Equity	1,000,000	1,000,000
Total	\$3,000,000	\$3,000,000

The Company prepaid its \$4,000,000 note payable to Bank One Capital Partners II, LLC on June 30, 1998 and incurred a prepayment premium equal to 4% of the amount, totaling \$160,000. In addition, the Company wrote-off the remaining debt discount related to this note payable of \$1,282,000. The prepayment penalty and write-off of this debt discount totaling \$1,442,000 were recorded as an extraordinary item, net of the related income tax benefit of \$533,000.

Debt maturities of long-term debt as of December 31, 1998 are as follows:

(6) Indiana Taxes

The Company has operated in three countries, the United States, Canada and Australia. For income tax return reporting purposes, the Company has approximately \$11,200,000 of net operating loss carryforwards and approximately \$723,000 of tax credit carryforwards available to offset future federal taxable income or federal tax liability in the United States. The research and development credit and net operating loss carryforwards expire at various dates through 2018.

The Tax Reform Act of 1986 contains provisions which may limit the net operating loss and credit carryforwards available to be used in any given year upon the occurrence of certain events including significant changes in ownership of the Company. (In accordance with certain provisions of the Internal Revenue Code of 1986, as amended (the "Code"), a greater than 50% change in ownership of a company within a three-year period results in an annual limitation on the Company's ability to utilize its net operating loss carryforwards from two periods prior to the ownership change.)

Deferred income tax assets and liabilities at December 31, 1999 and 1998, were as follows:

	December 31, 1999	December 31, 1998
Current:		
State income tax	\$1,177,000	\$1,177,000
Federal income tax	70,000	70,000
State and local income tax	57,000	57,000
State and local sales tax	1,177,000	1,177,000
Noncurrent:		
State income tax	(1,177,000)	(1,177,000)
Federal income tax	(70,000)	(70,000)
State and local income tax	(57,000)	(57,000)
State and local sales tax	(1,177,000)	(1,177,000)
Total	\$1,177,000	\$1,177,000

The Company recorded an income tax benefit of \$568,000 in 1999 as it believes that it is more likely than not that the net operating loss generated will be utilized against future earnings. As of December 31, 1998, the Company reversed \$1,638,000 of the valuation allowance on part of its deferred tax assets, as the Company believes it is more likely than not that such tax benefits will be realized. Approximately \$531,000 of the income tax benefit in 1998 was allocated to the extraordinary loss on early extinguishment of debt.

Management believes the remaining tax assets of \$450,000 as of December 31, 1999 relate to tax credits that do not satisfy the realization criteria set forth in SFAS No. 109 and has recorded a valuation allowance for such tax assets.

	December 31, 1999	December 31, 1998
Current:		
State income tax	\$1,177,000	\$1,177,000
Federal income tax	70,000	70,000
State and local income tax	57,000	57,000
State and local sales tax	1,177,000	1,177,000
Noncurrent:		
State income tax	(1,177,000)	(1,177,000)
Federal income tax	(70,000)	(70,000)
State and local income tax	(57,000)	(57,000)
State and local sales tax	(1,177,000)	(1,177,000)
Total	\$1,177,000	\$1,177,000

(7) Commitments

The Company leases its office and research facilities and certain equipment under operating lease agreements which expire through November 2003. Rent expense for the years ended December 31, 1999, 1998 and 1997 was approximately \$1,370,000, \$1,830,000 and \$718,000, respectively. Future minimum lease obligations under these agreements are as follows:

	December 31, 1999	December 31, 1998
Current:		
State income tax	\$1,177,000	\$1,177,000
Federal income tax	70,000	70,000
State and local income tax	57,000	57,000
State and local sales tax	1,177,000	1,177,000
Noncurrent:		
State income tax	(1,177,000)	(1,177,000)
Federal income tax	(70,000)	(70,000)
State and local income tax	(57,000)	(57,000)
State and local sales tax	(1,177,000)	(1,177,000)
Total	\$1,177,000	\$1,177,000

(8) Employee Benefit Plans

The Company has a 401(k) plan under which eligible employees may defer up to 15% of their compensation. The Company may make matching contributions and discretionary contributions if approved by the Board of Directors. For 1998 and 1997, no employer matching or discretionary contributions were made to the 401(k) plan. However, in January 1999, the Company's Board of Directors approved a matching contribution for employees, which was effective April 1, 1999. The Company matches 50% of employee contributions up to 6% of the employee's salary, not to exceed \$1,000 in 1999 and 2000, respectively. Matching contributions will vest 35%, 70% and 100% for one, two and three years of service, respectively.

(9) Related Party Transactions

The Company provides data management and certain consulting services to and from equipment from entities in which a stockholder of the Company has an ownership interest. A representative of the stockholder was a member of the Company's Board of Directors until December 2, 1999. The Company received net proceeds of approximately \$6,979,000, \$6,735,000 and \$6,950,000 in 1999, 1998 and 1997, respectively, pursuant to these agreements. Amounts due to the stockholder under the capital lease agreements net of amounts due to the Company for services rendered as of December 31, 1999 and 1998 were \$2,352,000 and \$3,962,000, respectively. The loans have interest rates ranging from 7.75% to 9.50%, require monthly payments and have expiration dates varying through October 2002.

(10) Reportable Segments and Major Customers

The Company has two reportable segments, data management services and licenses and implementation services. The Company allocates its reportable segments based on revenue for each segment and costs directly related to each segment. General and administrative, sales and

marketing and other costs are not measured by segment. Data management services include the provisioning of an outsourcing solution for 9-1-1 data management to customers, including ILECs, CLECs, wireless carriers and state and local government. Licenses and implementation services include the licensing, customization and installation of the Company's 9-1-1 software solutions. Substantially all of the Company's customers are in the United States.

These segments are managed separately because the nature of and resources used for each segment is unique. Data management services include ongoing data management and monitoring of systems and other enhanced services. Under data management services, the customer's data is transferred to the Company's systems and the Company owns the systems used to manage the data. Under licenses and implementation services, the customer performs data management and systems monitoring activities. The customer also owns the hardware, licenses the Company's software and maintains the data on its internal systems under this segment.

Revenue and costs are segregated in the Statement of Operations for the two reportable segments. The Company does not segregate assets between the segments as it is impractical to do so.

Major Customers

Revenue from certain customers exceeded 10% of total revenue for the respective year as follows: 27%, 27% and 26% in 1999, 47%, 25% and 21% in 1998 and 30%, 29% and 22% in 1997. Contracts with certain of these customers have a two-year duration until provided the first anniversary has been based upon the number of subscriber records managed and upon the services selected by the customer. All of these customers are in the Company's data management services segment.

(11) Legal Matters

The Company is subject to various claims and business disputes in the ordinary course of business. While the outcome of these matters cannot be predicted with certainty, management anticipates that the ultimate outcome of the lawsuits will not have a material impact on the financial statements. Federal and state regulations governing 9-1-1 service provisioning have typically applied to local exchange service providers. The Company plans to provide 9-1-1 services directly to state and local governments rather than local exchange carriers in certain areas. Since this is the first time that such services have been provided in this manner, the regulations are being challenged and clarified for the first time. The Company believes that the services it provides are within the scope of the existing regulations and that any challenges to the regulations will be decided in the Company's favor. However, if the regulations are challenged and are not decided in the Company's favor, the Company may be prohibited from expanding its services to certain markets.

Report of Independent Public Accountants

To the Board of Directors and Stockholders of SCC Communications Corp.

We have audited the accompanying balance sheet of SCC Communications Corp. (a Delaware corporation) as of December 31, 1999 and 1998, and the related statements of operations, stockholders' equity (deficit) and cash flows for each of the three years in the period ended December 31, 1999. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of SCC Communications Corp. as of December 31, 1999 and 1998, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 1999, in conformity with accounting principles generally accepted in the United States.

Market for the Registrant's Common Equity and Related Stockholder Matters

Our common stock is traded on the Nasdaq National Market under the symbol "SCCX." We commenced our initial public offering of the common stock on June 24, 1998 at a price of \$12 per share. Prior to such date, there was no public market for the common stock. The following table sets forth the high and low bid prices for the common stock for the periods indicated, as reported on the Nasdaq National Market.

HTGH LOW

As of February 23, 2000, there were approximately 173 holders of record.

We have not paid any cash dividends on our capital stock since our inception, and do not expect to pay cash dividends on our common stock in the foreseeable future. Certain covenants contained in our first credit agreement restrict the payment of dividends without the lender's prior consent. Payments of future dividends, if any, will be at the discretion of our Board of Directors, subject to the restrictions discussed above, after taking into account various factors, including our financial condition, operating results, cash needs and expansion plans.

WINfirst Selects SCC Communications to Provide 9-1-1 Service to Customers

FOR IMMEDIATE RELEASE

Boulder, Colo. (December 7, 2000)—SCC Communications (Nasdaq: SCCX), the world's leading provider of 9-1-1 data management services, announced today that WINfirst has selected SCC's TelConnectSM package to provide enhanced 9-1-1 (E9-1-1) service to WINfirst residential customers. The TelConnect system will allow WINfirst customers access to immediate and reliable 9-1-1 service.

Based in Denver, WINfirst is building an entirely new fiber-to-the-home (FTTH) residential network that will provide high bandwidth for voice, video and data applications. WINfirst has already received regulatory approval to build networks in Sacramento and San Diego, California; Austin, Dallas, Houston and San Antonio, Texas; and has received a temporary permit pending full approval in Portland, Oregon. Combined, WINfirst will provide its service to more than 3.2 million homes. WINfirst is pursuing regulatory approval in San Francisco, Oakland, California, Los Angeles, Seattle, Phoenix and Nevada.

WINfirst, which signed a three-year contract with SCC, will now benefit from the leading-edge TelConnect suite of 9-1-1 data management services. TelConnect enables integrated communications providers (ICPs) and competitive local exchange carriers (CLECs) to cost-effectively outsource the complex job of meeting 9-1-1 data management requirements.

"WINfirst is committed to providing its customers with the highest quality service and that includes 9-1-1 emergency service. This is an essential service and we wanted to work with the country's leading and most experienced provider of 9-1-1 data management services," said Frank Casazza, WINfirst president and chief operating officer. "We realize the critical importance of 9-1-1 service. It can be a matter of life and death—which is why we selected SCC to provide our customers with the most accurate and reliable access to 9-1-1 emergency service available."

"TelConnect will handle all of WINfirst's data validation and formatting, error analysis and resolution and delivery of the data to the appropriate public safety agencies," said Mark Scott, vice president and general manager of SCC's CLEC business unit. "And while our experts manage these time-consuming but critical tasks, WINfirst can focus on expanding its markets and services."

About SCC

SCC Communications Corp. (Nasdaq: SCCX) is the leading provider of 9-1-1 data management services to incumbent local exchange carriers (ILECs), competitive local exchange carriers (CLECs), integrated communications providers (ICPs) and wireless carriers in the United States. SCC manages the data that allows the routing and delivery of 9-1-1 calls to the appropriate answering point along with accurate information about the caller's location. SCC provides 9-1-1 services to 20 leading wireless telecommunications carriers and 38 leading wireline telecommunications carriers. SCC currently manages the records for approximately 89.4 million wireline and wireless telephone subscribers, including 4.8 million CLEC subscribers, and more than 2.5 million revenue-generating wireless subscribers. The company also develops innovative, value-added information technology systems and software products for the location-based services market. To receive SCC press releases and company updates via e-mail, please register at the company's Web site: <http://www.scc911.com>.

About WINfirst

WINfirst is building a new fiber-to-the-home residential network using fiber-optic technology in conjunction with Ethernet networking standards to break the last-mile bottleneck. WINfirst will provide the highest quality of customer service and choice, the convenience of one-stop shopping for Internet, cable TV and telephone service and the value of a bundled-service offering. For more information about WINfirst, visit <http://www.winfirst.com>.

SPAS 123, "Stock Price"/
SPAS 123, "Accounting for Stock-Based Compensation," defined a fair value-based method of accounting for employee stock options or similar equity instruments. However, SPAS 123 allows the continued measurement of compensation cost for such plans using the intrinsic value based method prescribed by APB Opinion No. 25, provided that pro forma disclosures are made of net incomes or loss assuming the fair value based method of SPAS 123 had been applied. The Company has elected to account for its stock-based compensation plans under APB 25, accordingly, for purposes of the two pro forma disclosures presented herein, the Company has computed the fair value of all options granted under the 1995 Plan, which succeeds the 1990 Option Plan, during 1999, 1998 and 1997, using the Black-Scholes pricing model and the following weighted average assumptions:

To estimate lives of options for this valuation, it was assumed options will be exercised upon becoming fully vested. All options are initially assumed to vest. Conservative compensation costs recognized in pre-former net income or loss with respect to options that are forfeited prior to vesting is adjusted as a reduction of pre-former compensation expense in the period of forfeiture. Because the Company's common stock was not yet publicly traded, the expected market volatility was assumed to be zero in 1997. In 1998 and 1999, the Company's common stock was not yet traded for an assumed period of time, thus the expected market volatility was based on the stock prices of companies whose operations are similar to the Company's.

Actual volatility of the Company's common stock may vary. Fair value computations are highly sensitive to the volatility factor assumed; the greater the volatility, the higher the computed fair value of options granted.

The total fair value of options granted under the 1998 Option Plan and the ESPP was computed to be approximately \$2,630,000, \$1,040,000 and \$499,000 for the years ended December 31, 1998, 1999 and 1997, respectively. These amounts are amortized ratably over the vesting periods of the options or recognized at date of grant if no vesting period is required. Pro forma stock-based compensation, net of the effect of forfeitures, was \$436,000, \$417,000 and \$232,000 for 1999, 1998 and 1997, respectively.

If the Company had accounted for its stock-based compensation plan in accordance with SFAS 123, the Company's net income from continuing operations would have been reported as follows:

The Company prepaid its \$4,000,000 note payable to Banc One Capital Partners II, LLC on June 30, 1998 and incurred a prepayment premium equal to 1% of the amount, totaling \$100,000. In addition, the Company wrote-off its remaining debt discount related to the note payable of \$1,282,000. The prepayment premium and write-off of the debt discount totaling \$1,442,000 were recorded as an extraordinary item, net of the related income tax benefits of \$533,000.

Debt maturities of long-term debt as of December 31, 1988 are as follows:

(6) **Income Taxes**

The Company has operated in three countries, the United States, Canada and Australia. For income tax return reporting purposes, the Company has approximately \$11,200,000 of net operating loss carryforwards and approximately \$723,000 of tax credit carryforwards available to offset future federal taxable income or federal tax liability in the United States. The research and development credit and net operating loss carryforwards expire at various dates through 2019.

The Tax Reform Act of 1986 contains provisions which may limit the net operating loss and credit carryforwards available to an entity for any given year upon the occurrence of certain events including significant changes in ownership of the Company. In accordance with certain provisions of the Internal Revenue Code of 1986, as amended (the "Code"), a greater than 50% change in ownership of a company within a three-year period results in an annual limitation on the Company's ability to utilize its net operating loss carryforwards from tax periods prior to the ownership change.

Deferred income tax assets and liabilities at December 31, 1999 and 1998, were as follows:

December 31,

	1999	1998
Current:		
State income taxes	\$45,000	\$115,000
State sales taxes	270,000	265,000
State property taxes	51,000	218,000
State franchise taxes	43,000	202,000
Noncurrent:		
State income taxes	\$161,000	\$121,000
State sales taxes	134,000	121,000
State property taxes	175,000	244,000
State franchise taxes	222,000	244,000
Total	\$1,008,000	\$1,100,000

The Company recorded an income tax benefit of \$568,000 in 1999 as it believes that it is more likely than not that the net operating loss generated will be utilized against future earnings. As of December 31, 1998, the Company recorded \$1,688,000 of the valuation allowance on part of its deferred tax assets, as the Company believes it is more likely than not that such tax benefits will be realized. Approximately \$533,000 of the income tax benefit in 1998 was allocated to the extraordinary loss on early extinguishment of debt.

Management believes the remaining tax assets of \$450,000 as of December 31, 1999 relate to tax credits that do not satisfy the realization criteria set forth in SFAS No. 109 and has recorded a valuation allowance for such net tax assets.

December 31,

	1999	1998	1997
Revenue:			
Service revenue	\$1,468,000	\$1,325,000	\$1,225,000
License revenue	2,444,000	2,125,000	1,925,000
Operating expenses:			
Cost of sales	\$1,065,000	\$955,000	\$855,000
Salaries and wages	631,000	575,000	525,000
Contractual fees	124,000	115,000	105,000
Travel	161,000	155,000	145,000
Depreciation and amortization	150,000	145,000	135,000
Interest expense	150,000	145,000	135,000
Income tax expense	508,000	455,000	405,000
Operating income	\$1,468,000	\$1,325,000	\$1,225,000
Other income:			
Interest income	408,000	375,000	325,000
Dividend income	708,000	655,000	575,000
Gain on sale of equipment	100,000	95,000	85,000
Gain on sale of investments	100,000	95,000	85,000
Other expense:			
Interest expense	508,000	455,000	405,000
Income before income taxes	\$2,468,000	\$2,125,000	\$1,925,000
Income tax expense	1,468,000	1,325,000	1,225,000
Net income	\$1,000,000	\$800,000	\$700,000

(7) Coconducit

The Company leases its office and research facilities and certain equipment under operating lease agreements which expire through November 2003. Rent expense for the years ended December 31, 1999, 1998 and 1997 was approximately \$1,370,000, \$1,090,000 and \$718,000, respectively. Future minimum lease obligations under these agreements are as follows:

(8) Employee Benefit Plan

The Company has a 401(k) plan under which eligible employees may defer up to 15% of their compensation. The Company may make matching contributions and discretionary contributions if approved by the Board of Directors. For 1998 and 1997, no employer matching or discretionary contributions were made to the 401(k) plan. However, in February 1999, the Company's Board of Directors approved a matching contribution for employees, which was effective April 1, 1999. The Company matches 50% of employee contributions up to 6% of the employee's salary, not to exceed \$1,000 in 1999 and 2000, respectively. Matching contributions will vest 35%, 70% and 100% for one, two and three years of service, respectively.

(9) Related Party Transaction

The Company provides data management and certain consulting services to and from equipment from entities in which a stockholder of the Company has an ownership interest. A representative of the stockholder was a member of the Company's Board of Directors until December 2, 1999. The Company received net proceeds of approximately \$6,879,000, \$6,725,000 and \$6,859,000 in 1999, 1998 and 1997, respectively, pursuant to these agreements. Amounts due to the stockholder under the capital lease agreements as of December 31, 1999 and 1998 were \$3,262,000 and \$3,962,000, respectively. The leases have interest rates ranging from 7.75% to 9.50%, require monthly payments and have expiration dates varying through October 2002.

(10) Reportable Segments and Major Customers

The Company has two reportable segments, data management services and Services and Implementation services. The Company measures its reportable segments based on revenue for each segment and costs directly related to each segment. General and administrative, sales and

marketing and other costs are not measured by segment. Data management services include the provisioning of an outsourcing solution for 9-1-1 data management to customers, including ILECs, CLECs, wireless carriers and state and local governments. Services and Implementation services include the licensing, customization and installation of the Company's 9-1-1 software solutions. Substantially all of the Company's customers are in the United States.

These segments are managed separately because the nature of and resources used for each segment is unique. Data management services include ongoing data management over monitoring of systems and other enhanced services. Under data management services, the customer's data is transferred to the Company's system and the Company stores the data used to manage the data. Under Services and Implementation services, the customer performs data management and system monitoring activities. The customer also owns the hardware, licenses the Company's software and maintains the data on its internal systems under this segment.

Revenue and costs are segregated in the Statement of Operations for the two reportable segments. The Company does not segregate assets between the segments as it is impractical to do so.

Major Customers

Revenue from certain customers exceeded 10% of total revenue for the respective year as follows: 27%, 27% and 26% in 1999; 27%, 25% and 21% in 1998 and 30%, 28% and 22% in 1997. Contracts with certain of these customers have a term of duration and provide for fixed monthly fees based upon the number of subscriber records managed and upon the services selected by the customer. All of these customers are in the Company's data management services segment.

(11) Legal Matters

The Company is subject to various claims and business disputes in the ordinary course of business. While the outcome of these matters cannot be predicted with certainty, management anticipates that the ultimate outcome of the issues will not have a material impact on the financial statements. Federal and state regulations governing 9-1-1 service provisioning have typically applied to local exchange service providers. The Company plans to provide 9-1-1 services directly to state and local governments rather than local exchange carriers in certain areas. Since this is the first time that such services have been provided in this manner, the regulations are being challenged and clarified for the first time. The Company believes that the services it provides are within the scope of the existing regulations and that any challenge to the regulations will be decided in the Company's favor. However, if the regulations are challenged and are not decided in the Company's favor, the Company may be prohibited from providing its services to certain markets.

Report of Independent Public Accountants

To the Board of Directors and Stockholders of SCC Communications Corp.

We have audited the accompanying balance sheets of SCC Communications Corp. (a Delaware corporation) as of December 31, 1999 and 1998, and the related statements of operations, stockholders' equity (deficit) and cash flows for each of the three years in the period ended December 31, 1999. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of SCC Communications Corp. as of December 31, 1999 and 1998, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 1999, in conformity with accounting principles generally accepted in the United States.

Market for the Registrant's Common Equity and Related Stockholder Matters

Our common stock is traded on the Nasdaq National Market under the symbol "SCCX." We commenced our initial public offering of the common stock on June 24, 1998 at a price of \$12 per share. Prior to such date, there was no public market for the common stock. The following table sets forth the high and low bid prices for the common stock for the periods indicated, as reported on the Nasdaq National Market.

High Low

As of February 29, 2000, there were approximately 173 holders of record.

We have not paid any cash dividends on our capital stock since our inception, and do not expect to pay cash dividends on our common stock in the foreseeable future. Certain covenants contained in our line of credit agreement restrict the payment of dividends without the lender's prior consent. Payment of future dividends, if any, will be at the discretion of the Board of Directors, subject to the restrictions discussed above, after taking into account various factors, including our financial condition, operating results, cash needs and expenditure plans.

WINfirst Selects SCC Communications to Provide 9-1-1 Service to Customers

FOR IMMEDIATE RELEASE

Boulder, Colo. (December 7, 2000)--SCC Communications (Nasdaq: SCCX), the world's leading provider of 9-1-1 data management services, announced today that WINfirst has selected SCC's TelConnectSM package to provide enhanced 9-1-1 (E9-1-1) service to WINfirst residential customers. The TelConnect system will allow WINfirst customers access to immediate and reliable 9-1-1 service.

Based in Denver, WINfirst is building an entirely new fiber-to-the-home (FTTH) residential network that will provide high bandwidth for voice, video and data applications. WINfirst has already received regulatory approval to build networks in Sacramento and San Diego, California; Austin, Dallas, Houston and San Antonio, Texas; and has received a temporary permit pending full approval in Portland, Oregon. Combined, WINfirst will provide its service to more than 3.2 million homes. WINfirst is pursuing regulatory approval in San Francisco, Oakland, California, Los Angeles, Seattle, Phoenix and Nevada.

WINfirst, which signed a three-year contract with SCC, will now benefit from the leading-edge TelConnect suite of 9-1-1 data management services. TelConnect enables integrated communications providers (ICPs) and competitive local exchange carriers (CLECs) to cost-effectively outsource the complex job of meeting 9-1-1 data management requirements.

"WINfirst is committed to providing its customers with the highest quality service and that includes 9-1-1 emergency service. This is an essential service and we wanted to work with the country's leading and most experienced provider of 9-1-1 data management services," said Frank Casazza, WINfirst president and chief operating officer. "We realize the critical importance of 9-1-1 service. It can be a matter of life and death-which is why we selected SCC to provide our customers with the most accurate and reliable access to 9-1-1 emergency service available."

"TelConnect will handle all of WINfirst's data validation and formatting, error analysis and resolution and delivery of the data to the appropriate public safety agencies," said Mark Scott, vice president and general manager of SCC's CLEC business unit. "And while our experts manage these time-consuming but critical tasks, WINfirst can focus on expanding its markets and services."

About SCC

SCC Communications Corp. (Nasdaq: SCCX) is the leading provider of 9-1-1 data management services to incumbent local exchange carriers (ILECs), competitive local exchange carriers (CLECs), integrated communications providers (ICPs) and wireless carriers in the United States. SCC manages the data that allows the routing and delivery of 9-1-1 calls to the appropriate answering point along with accurate information about the caller's location. SCC provides 9-1-1 services to 20 leading wireless telecommunications carriers and 38 leading wireline telecommunications carriers. SCC currently manages the records for approximately 89.4 million wireline and wireless telephone subscribers, including 4.8 million CLEC subscribers, and more than 2.5 million revenue-generating wireless subscribers. The company also develops innovative, value-added information technology systems and software products for the location-based services market. To receive SCC press releases and company updates via e-mail, please register at the company's Web site: <http://www.scc911.com>.

About WINfirst

WINfirst is building a new fiber-to-the-home residential network using fiber-optic technology in conjunction with Ethernet networking standards to break the last-mile bottleneck. WINfirst will provide the highest quality of customer service and choice, the convenience of one-stop shopping for Internet, cable TV and telephone service and the value of a bundled-service offering. For more information about WINfirst, visit <http://www.winfirst.com>.
